Field Detention Unit (FDU)
Interview & Processing Unit (IPU)
Clinical Triage Unit (CTU)
Medication Control & Distribution Unit (MCDU)
Surge Staffing & Operations Facility Unit (SSOFU)
Airborne Infection Isolation Unit (AIIU)
Virtual Immigration Court Unit (VICU)

Hardened, Code-Compliant Infrastructure For Immediate Field Operational Expansion

Secure. Scalable. Deployable in hours.

Field Detention Unit (FDU)

950 SQ. FT.
Usable Holding Space

3 FORTS UNITS
Rapid-Deploy Facility

UP TO 40 DETAINEES
Detainees per Unit

Secure, climate-controlled, short-term holding environment.

A rapidly deployable, hard-wall detention facility designed to provide secure temporary holding capacity wherever permanent infrastructure is unavailable, insufficient, or undergoing renovation.

KEY FEATURES

SECURITY

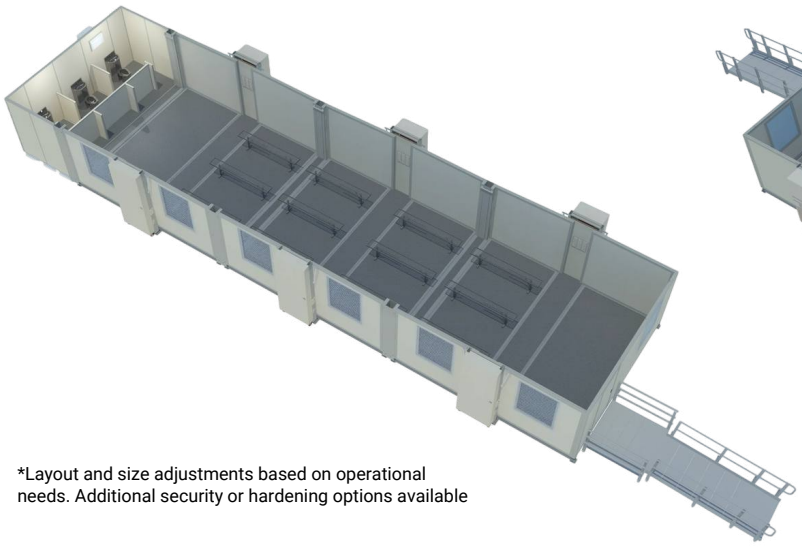

- Hard-walled, insulated construction and reinforced entry points
- Impact-resistant security windows with steel mesh
- Lockable access doors
- Secure, short-term detainee holding

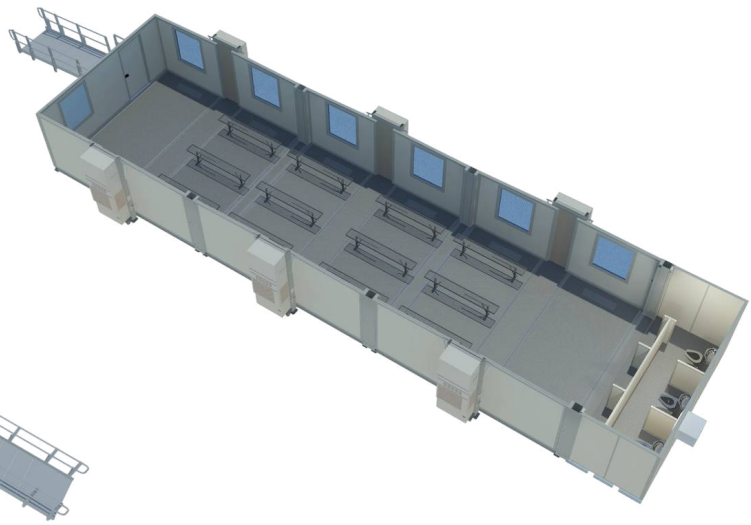

INFRASTUCTURE

- Semi-private, 3 stall bathroom and sink
- Sanitation-compliant flooring
- Integrated ventilation and life-safety systems
- ADA, fire and applicable building-code compliant
- Climate-controlled interior (A/C included)
- Integrated electrical power distribution
- LED, Interior and exterior lighting
- Low-voltage and data connectivity, including CAT6 / fiber capability
- Generator-ready, off-grid capable
- Hard-walled, insulated construction

DEPLOYMENT

- Deployment setup (approximately 4–6 hours)
- No heavy equipment required, forklift only
- Easily relocatable and reconfigurable as needs change

*Layout and size adjustments based on operational needs. Additional security or hardening options available

Interview & Processing Unit (IPU)

272 SQ. FT.
Usable Processing Space

1 FORTS UNIT
Rapid-Deploy Facility

CONFIGURABLE
Open Workstations

KEY FEATURES

PROCESSING

- Open workspace for rapid intake and processing
- Configurable agent workstations
- Designed for high-throughput, short-duration operations
- Supports initial case processing

INFRASTRUCTURE

- Climate-controlled interior (A/C included)
- Integrated electrical power distribution
- Interior lighting
- Low-voltage and data connectivity, including CAT6 / fiber capability
- Generator-ready for grid or off-grid operation
- Hard-walled, insulated construction

DEPLOYMENT

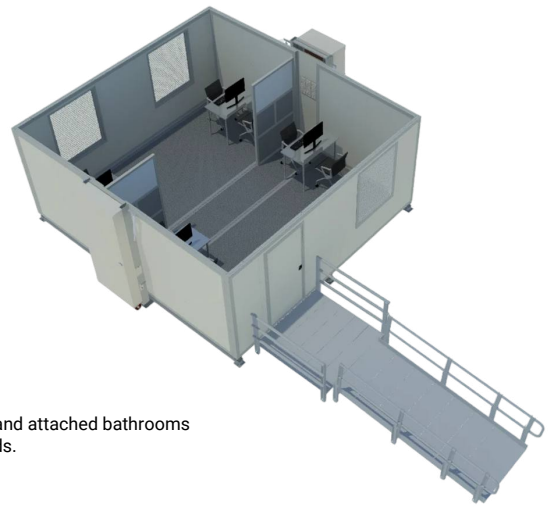

- Deployment setup (approximately 30 mins)
- No heavy equipment required
- Easily relocatable and reconfigurable as operational needs change

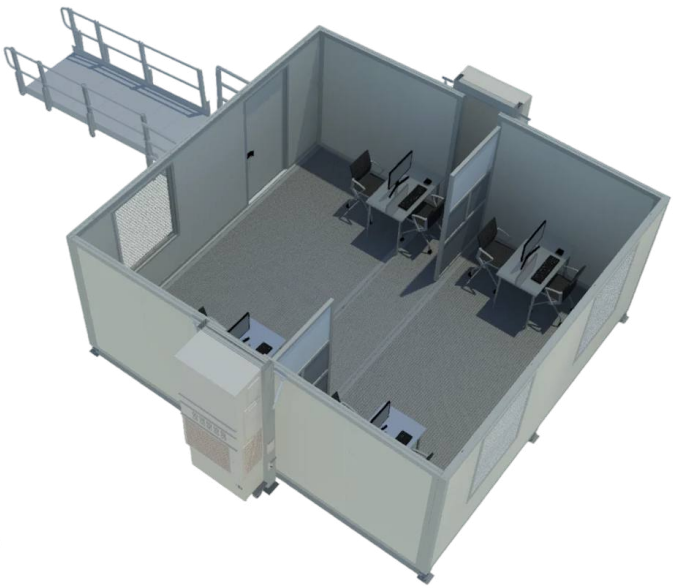

COMPLIANCE & RESILIENCE

- Hurricane-rated for sustained winds up to 142 mph
- ADA-compliant access
- Engineered for federal, state and local emergency-response missions

Short-Duration Processing. Fast Agent Turnover. High-Throughput Operations.

A rapidly deployable, hard-walled processing facility designed to support initial intake, interviewing and short-duration case processing in a secure, climate-controlled operational environment.

***Configurable**
Layout, size adjustments and attached bathrooms based on operational needs.

Clinical Triage Unit (CTU)

575 SQ. FT.
Clinical Operating Space

2 FORTS UNITS
Rapid-Deploy Facility

MEDICAL SCREENING
Triage & Intake Capability

KEY FEATURES

CLINICAL OPERATIONS

- Medical screening and triage capability
- Supports privacy and medical HIPAA confidentiality
- Dedicated administrative medical workspace
- Configurable for clinical intake and processing

INFRASTRUCTURE

- Climate-controlled interior (A/C included)
- Integrated electrical power distribution
- Interior lighting
- Low-voltage and data connectivity, including CAT6 / fiber capability
- Generator-ready for grid or off-grid operation
- Hard-walled, insulated construction

DEPLOYMENT

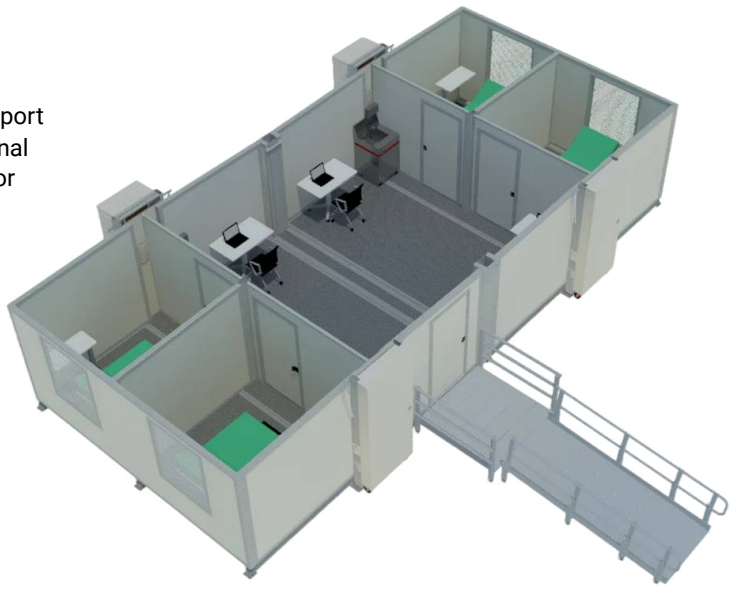

- Deployment setup (approximately 1–2 hours)
- No heavy equipment required
- Easily relocatable and reconfigurable as operational needs change

COMPLIANCE & RESILIENCE

- Hurricane-rated for sustained winds up to 142 mph
- ADA-compliant access
- Engineered for federal, state and local emergency-response missions

Rapid Medical Screening & Triage for Temporary Surge Operations

A rapidly deployable clinical environment designed to support medical screening, triage and clinical intake when additional healthcare capacity is required for detention, processing or emergency-response operations.

***Configurable**
Layout, size adjustments and attached bathrooms based on operational needs.

Medication Control & Distribution Unit (MCDU)

272 SQ. FT.
Usable Operational Space

1 FORTS UNIT
Rapid-Deploy Facility

SECURE MEDICATION
Storage & Controlled Dispensing

Secure Medication Storage & Controlled Dispensing

A rapidly deployable, hard-walled medical support facility designed for secure pharmaceutical storage, medication control and controlled dispensing within a climate-controlled operational environment.

KEY FEATURES

MEDICATION OPERATIONS

- Medication storage and pharmaceutical dispensing
- Reinforced secure storage areas
- Pharmaceutical-grade refrigeration
- Configurable workspace for medication management

INFRASTRUCTURE

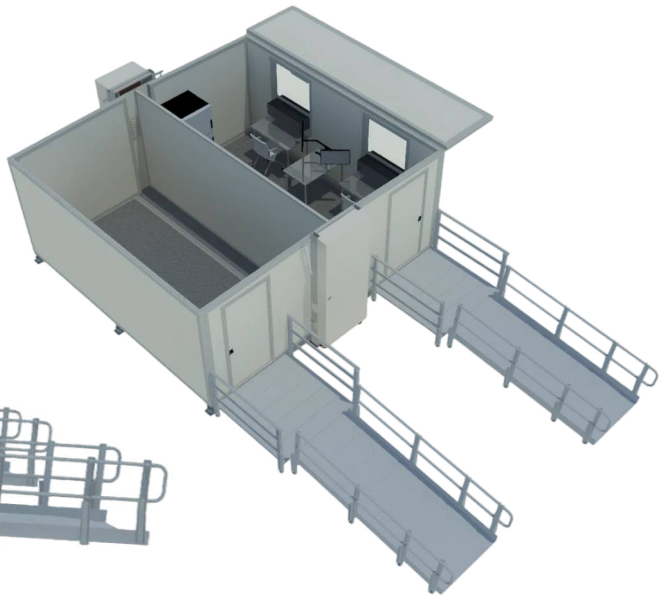

- Climate-controlled interior (A/C included)
- Integrated electrical power distribution
- Interior lighting
- Generator-ready for grid or off-grid operation
- Hard-walled, insulated construction

DEPLOYMENT

- Deployment setup (approximately 1 hour)
- No heavy equipment required
- Easily relocatable and reconfigurable as operational needs change

COMPLIANCE & RESILIENCE

- Hurricane-rated for sustained winds up to 142 mph
- ADA-compliant access
- Engineered for federal, state and local emergency-response missions

***Configurable**
Layout, size adjustments and attached bathrooms based on operational needs.

Surge Staffing & Operations Facility Unit (SSOFU)

575 SQ. FT.
Expandable Operations Space

2+ FORTS UNITS
Connected Configuration

MULTI-STATION
Administrative Workstations

KEY FEATURES

STAFF OPERATIONS

- Designed for prolonged daily administrative use
- Supports multiple full-time workstations
- Configurable for case-management and staff operations
- Expandable as staffing and operational requirements increase

INFRASTRUCTURE

- Climate-controlled interior (A/C included)
- Integrated electrical power distribution
- Interior lighting
- Generator-ready for grid or off-grid operation
- Hard-walled, insulated construction

DEPLOYMENT

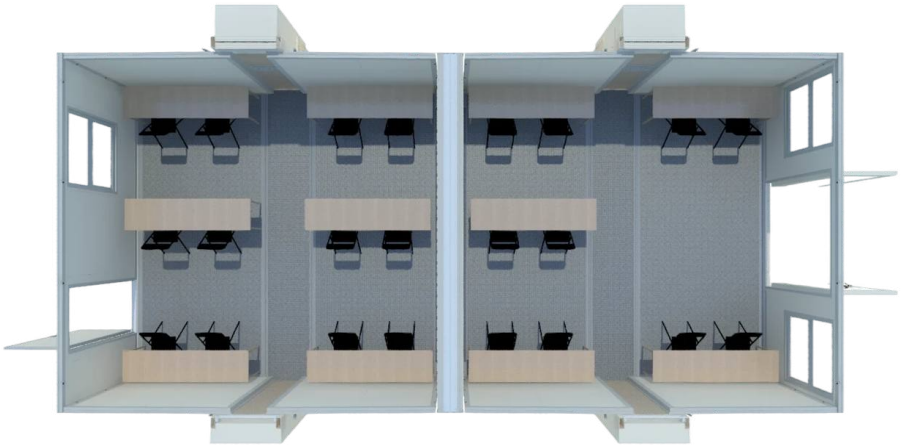

- Deployment setup (approximately 1–2 hours)
- No heavy equipment required
- Easily relocatable and reconfigurable as operational needs change

COMPLIANCE & RESILIENCE

- Hurricane-rated for sustained winds up to 142 mph
- ADA-compliant access
- Engineered for federal, state and local emergency-response missions

Rapid Workspace for Surge Staffing & Operations

An expandable, rapidly deployable facility designed to provide additional administrative workspace, case-management capacity and dedicated staff operations when existing facilities cannot accommodate increased personnel or workload.

***Configurable**
Layout, size adjustments and attached bathrooms based on operational needs.

Airborne Infection Isolation Unit (AIIU)

272 SQ. FT.
Usable Clinical Space

1 FORTS UNIT
Rapid-Deploy Facility

NEGATIVE-PRESSURE ISOLATION

KEY FEATURES

INFECTION CONTROL

- Negative-pressure ventilation system
- HEPA filtration and UV light sterilization
- Sealed walls and ceiling to maintain pressure integrity
- Dedicated environment for airborne infectious disease isolation

INFRASTRUCTURE

- Climate-controlled interior (A/C included)
- Integrated electrical power distribution
- Interior lighting
- Generator-ready for grid or off-grid operation
- Hard-walled, insulated construction

DEPLOYMENT

- Deployment setup (approximately up to 1 hour)
- No heavy equipment required
- Easily relocatable and reconfigurable as operational needs change

COMPLIANCE & RESILIENCE

- Hurricane-rated for sustained winds up to 142 mph
- ADA-compliant access
- Engineered for federal, state and local emergency-response missions

Single-Unit Medical Isolation Configuration

A rapidly deployable, hard-walled medical isolation facility designed to support airborne infection control through negative-pressure ventilation, HEPA filtration and a sealed clinical environment.

Patient Isolation Area | Negative-Pressure Environment | HEPA Filtration

***Configurable**
Layout, size adjustments and attached bathrooms based on operational needs.

Virtual Immigration Court Unit (VICU)

61 SQ. FT.
Usable Hearing Space

1 Person
Private Hearing Environment

Rapid-Deploy
Containerized Facility

Secure Virtual Hearing Configuration

A rapidly deployable, containerized video court hearing facility designed to provide private, climate-controlled access to virtual immigration court proceedings at or adjacent to detention units.

KEY FEATURES

VIRTUAL HEARING ENVIRONMENT

- Private, single-person hearing space
- Workstation configured for laptop-based proceedings
- Hardened Lexan security viewing wall
- Sound-controlled environment for hearing privacy

INFRASTRUCTURE

- Hard-walled steel container chassis
- Insulated walls and roof
- Climate-controlled interior (A/C included)
- Lockable front entry door
- Barred security window
- Non-slip commercial flooring
- LED interior lighting
- 6–10 kW generator or shore-power capability
- 61 sq. ft. of usable interior space
- Designed for secure placement adjacent to detention units
- Weather-resistant construction

DEPLOYMENT

- Rapidly deployable and relocatable
- Deployment setup (approximately 15-30 min)
- 5,000 lb. forklift requirement
- Compact footprint for placement near existing facilities

FORTS delivers scalable, compliant, rapidly deployable operational capacity for immigration / customs / border field missions.

- Deploys in hours
- Military-grade construction
- Grid/off-grid capable
- Scalable and relocatable
- Compliant with federal, state, local emergency response missions.

Ballistic Protection: Levels 1–8 are available to meet specified threat requirements, with protection configurations designed for threats ranging from handguns to rifles and armor-piercing rounds.
