BUILT FOR SURGE
DESIGNED FOR DIGNITY

When mass fatality events, pandemics, or infrastructure failures overwhelm hospital and coroner cold storage, preserving the deceased with dignity becomes critical. The FORTS® Mobile Mortuary Unit (M.M.U.) is a self-contained, refrigerated 20-foot ISO container engineered to expand fatality-management capacity within hours — deployable by land, sea, or air.

The FORTS. Mobile Mortuary Unit (M.M.U.) is engineered around an insulated 20-foot ISO shipping container with an integrated Carrier 69NT40-541-300 marine-grade refrigeration unit (R-134a) that maintains interior temperatures below 36ÅãF (2ÅãC) in ambient conditions up to 100ÅãF. Body storage is provided by 304 stainless-steel modular racks and body trays, arranged in three tiers along both interior walls with a full-length center aisle for gurney access.

The electrical system operates on 3-phase 240 or 480 VAC, 60 Hz service, with LED interior lighting and an insulated 36” Å~ 80” front entry door for loading. Interior surfaces are seamless, non-porous, and bacteriostatic to support infection prevention and mass-decontamination protocols. Full decontamination between deployments is supported via Sansosil dry-fog hydrogen peroxide/silver-ion treatment.
