Medical Oxygen Support Unit (Trailer)

The Medical Oxygen Support Trailer is a rapidly deployable oxygen supply and distribution platform engineered to support hospitals, healthcare systems, emergency management agencies, disaster response teams, and temporary medical operations during infrastructure failures, patient surges, emergencies, or planned maintenance events.

- ➤ Medical-Grade Oxygen (93% + - 3%)
- ➤ Low-Pressure Output: 90 L/min - 50 PSI
- ➤ High-Pressure Output: 45 L/min - 2200PSI
- ➤ 2 - 4 High Pressure (H) Storage Tanks
- ➤ High Pressure Tank Refills: D, E, Jumbo D, + H
- ➤ Direct Ambulance Refills
- ➤ Compact Footprint, Tow-and-Go Deployment
- ➤ Medical Grade Air (21%)

Key Features

- Rapid deployment and turnkey operation
- Supplemental oxygen support for healthcare facilities
- Mobile and relocatable infrastructure platform
- Climate-controlled operational environment
- Lockable access doors and secure storage compartments
- Designed for long-term deployments or temporary emergency use

Weather-resistant exterior construction

Built-in ventilation and safety systems

Transportable by truck, rail, air, or sea

Low-maintenance infrastructure platform

Medical Oxygen Support Container

The Emergency Medical Oxygen Support Container is a complete oxygen and medical air generation and refill station housed inside a secure, rapidly deployable 20-foot mobile container. Engineered for hospitals, emergency response agencies, disaster relief operations, military medical support, and temporary healthcare facilities, the system delivers reliable oxygen infrastructure when permanent systems are unavailable, overloaded, or compromised.

Designed for mobility, durability, and operational continuity, the unit provides on-site oxygen generation, storage, refill capabilities, and medical air support in a self-contained deployable platform. The Oxygen Support Container can operate independently or integrate directly with field hospitals, mobile clinics, emergency departments, temporary treatment centers, and surge response

- ➤ Medical-Grade Oxygen (93% + - 3%)
- ➤ Low-Pressure Output 135 L/min - 50 PSI
- ➤ High Pressure Output 45 L/min - 2200 PSI
- ➤ Five Integrated High Pressure (H) Storage Tanks
- ➤ High Pressure Tank Refills: D, E, Jumbo D, +H
- ➤ Direct Ambulance Refills
- ➤ Climate-Controlled, Secure Container
- ➤ Seamless Integration - Field & Fixed Hospital Systems

Key Features

- Complete oxygen and medical air generation system
- Secure 20-foot deployable container platform
- Rapid deployment with minimal site preparation
- Supports emergency medical surge operations
- Built for disaster response and healthcare continuity
- Compatible with field hospitals and mobile medical infrastructure
- Designed for long-term deployment or temporary emergency use

Weather-resistant exterior construction

Built-in ventilation and safety systems

Transportable by truck, rail, air, or sea

Low-maintenance infrastructure platform

DEPLOYED AND UTILIZED BY: VA | U.S. Department of Veterans Affairs | DHA Defense Health Agency HOSPITAL EXPANSION SOLUTION | Florida HEALTH | U.S. Department of War

MEDICAL GRADE OXYGEN TANK FILLS & GENERATION

- 24/7 Dispatch-Ready
- All Units Tested and Operated Weekly
- Integrated Digital Live Maintenance Tracking
- Onsite Inventory of Service Parts
- Integrated Generator, HVAC & Lighting
- Units Certified for Use In Patient Care Environments
